

## POWER, DATA & COMMUNICATIONS MODULE

- The PDCM (Power, Data and Communications Module) system from SpaceCo is 100% modular for above work surface power, data and communications distribution.

A 'first in class' truly modular solution is now available. The PDCM by SpaceCo is a plug-and-play platform that is simple and easy to use. The specific power, data and communication needs of employees can now be accessed on the work surface—no more strenuous bending or kneeling under the workspace to navigate multiple cords. The PDCM is available in both standard and tailored configurations.

This customizable solution is ergonomic, convenient, and safe. The PDCM offers flexibility and range, with a customizable configuration of outlets, ethernet ports, laptop adapters and USB ports. The user can customize the PDCM to best suit his or her communications needs.
